OBJECTIVE

MCA Graduate with a strong foundation in software systems design, coding and debugging. Proficient in Java, Data Structures, MERN stack and SQL. I have built scalable applications using modern web technologies. Eager to leverage my analytical and problem-solving skills in software development projects across multiple platforms.

EDUCATION

Sir M.Visvesvaraya institute of technology, Bengaluru

Master of Computer Applications (MCA) - 8.96 CGPA 2024-2026

Yuvarajas College, Mysore

Bachelor of Computer Applications (BCA) - 9.03 CGPA 2021-2024

SKILLS

- **Programming Languages** : Java, C, JavaScript, Python.
- **Frameworks** : React.js, Node.js, Express.js, Bootstrap, Tailwind CSS,HTML,CSS.
- **Databases** : SQL, MongoDB.
- **Tools and Platforms** : Git & Github, Docker, VS Code, Render, Vercel.
- **Other skills** : Data Structures & Algorithms, OOP, Operating Systems, DBMS.

PROJECTS

1. CampusHire - Full-Stack Placement Management Platform

Technologies: React.js, Node.js, Express.js, MongoDB, JWT, Gemini API, Docker, Render

Live : <https://campushire-frontend-4da2.onrender.com>

GitHub: <https://github.com/Ranjitha-Sangam/CampusHire>

- Developed a full-stack placement platform with role-based authentication for students, recruiters, and admins.
- Implemented job applications, resume uploads, recruiter approval, company management, and application tracking.
- Integrated a Gemini-powered AI Placement Mentor for DSA, resume, interview, and career guidance.
- Dockerized and deployed the application on Render with MongoDB Atlas.

2. Nestifyy – Full Stack Accommodation Platform

Technologies : HTML, CSS, Bootstrap, JavaScript, Node.js, Express.js, MongoDB, Mongoose, EJS.

Live : <https://nestifyy-b4c3.onrender.com/login>

GitHub : <https://github.com/Ranjitha-Sangam/nestifyy>

- Built full-stack accommodation platform supporting CRUD operations, authentication and image upload.
- Implemented authentication using Passport.js and session-based login system.
- Integrated Cloudinary for image uploads and Mapbox API for geolocation of listings.
- Implemented MVC architecture to develop robust RESTful APIs with server-side validation, enhancing software systems design and coding practices.
- Deployed the application on Render with MongoDB Atlas, enabling reliable cloud-based access and scalable application hosting.
