OBJECTIVE

MCA graduate passionate about full-stack development and problem solving, with hands-on experience building scalable web applications using React.js, Node.js, [Express.js](#) and MongoDB. Seeking software development opportunities to apply technical and problem-solving skills in real-world projects.

EDUCATION

Sir M.Visvesvaraya institute of technology, Bengaluru

Master of Computer Applications (MCA) - 8.84 CGPA 2024-2026

Yuvarajas College,Mysore

Bachelor of Computer Applications (BCA) - 9.03 CGPA 2021-2024

SLV PU College,Chitradurga

PCMB - 94% 2019-2021

SKILLS

- **Programming Languages & Frameworks** :Java, C, Python, HTML, CSS, JavaScript, React.js, Bootstrap, Tailwind CSS, Node.js, Express.js, RESTful APIs, Mongoose.
 - **Databases** : SQL, MongoDB
 - **Tools and Platforms** : Git & Github, VS Code
-

PROJECTS

Nestifyy – Full Stack Accommodation Platform

Technologies : HTML, CSS, Bootstrap, JavaScript, [Node.js](#), Express.js, MongoDB, Mongoose, EJS.

Live : <https://nestifyy-b4c3.onrender.com/listings> | **GitHub** : <https://github.com/Ranjitha-Sangam/nestifyy>

- Built an Airbnb-like platform allowing users to create and manage property listings with reviews.
- Implemented authentication using Passport.js and session-based login system.
- Integrated Cloudinary for image uploads and Mapbox API for geolocation of listings.
- Followed MVC architecture and built RESTful APIs with server-side validation.
- Deployed the application on Render with MongoDB Atlas enabling real-time access to the platform.

React Weather Forecast Application

Technologies : [React.js](#), OpenWeather API, Render **Live** : <https://weather-app-react-vdh8.onrender.com>

- Developed a responsive weather application using React.js and OpenWeather API to fetch real-time weather data.
- Implemented dynamic city-based search functionality with temperature, humidity and weather condition details.
- Secured API keys using environment variables and deployed the application on Render using GitHub integration.
